

Ravi Shankar Kumar

Full Stack Developer •

+91 9065762828 | ravishankarx213@gmail.com | <https://ravishankarx28.vercel.app/>

PROFESSIONAL SUMMARY:

Full-Stack Developer with practical experience designing and deploying scalable web applications and robust backend architectures using **React, TypeScript, Node.js, Express, MongoDB, and AWS**.

Hands-on experience **building production-ready systems, including responsive UI development, RESTful API design, database modeling, seamless third-party integrations, and performance optimization**. Known for rapid problem-solving, clean coding practices, and delivering high-quality, user-centric digital solutions.

TECHNICALS SKILLS:

Backend:	Node.js, Express, Redis
Cloud:	AWS (Lambda, Fargate, S3, ECS, EKS, EventBridge, SQS)
Databases:	MongoDB , PostgreSQL, Redis , SQLite
DevOps:	CI/CD pipelines, Git
Web:	ReactJS , Tailwind CSS, OAuth

WORK EXPERIENCE

CSDT IT Solution | Trainee

May 2024 - Oct 2024 , Patna (India)

- Learned and applied core web development technologies including **HTML, CSS, and JavaScript** to build responsive and user-friendly interfaces.
 - Developed dynamic front-end applications using **React.js**, focusing on component-based architecture and state management.
 - Built and tested RESTful APIs using **Node.js** and **Express.js** to handle server-side logic and data flow.
 - Worked with **MongoDB** for database design, CRUD operations, and efficient data management in full-stack applications.
 - Integrated **frontend** and **backend** systems to create complete full-stack projects with real-time functionality.
 - Gained hands-on experience in debugging, code optimization, and improving application performance.
 - Collaborated on projects and followed best practices like version control (Git) and modular coding.
 - Strengthened understanding of **full stack development** lifecycle, from development to deployment.
-

CERTIFICATION

Training & Internship certification - Full Stack Web Development with GenAI + DSA Coding Ninjas x IITM Pravartak Technologies Foundation(IIT Madras)

May 2025 - Feb 2026

- Completed an intensive 9-month training program covering **Full Stack Web Development, Data Structures & Algorithms** and **Generative AI**.
- Built hands-on projects using the **MERN** stack and industry-standard development practices.
- Gained practical experience in problem-solving, **Backend Development, APIs**, database authentication and **AI** fundamentals.

Industry Project Certification – Full-Stack AI-Enabled Online Quiz and Assessment Platform Pinsout (Via Qollab Platform)

July 2026

- Successfully completed an industry project on developing a **Full-Stack AI-Enabled Online Quiz and Assessment Platform**.

- Built and integrated full-stack application features using modern web development technologies and industry best practices.
- Worked on backend APIs, database design, authentication, and responsive frontend development.
- Applied problem-solving and software engineering principles to deliver practical, production-oriented solutions.
- Received a Performance Rating of 4.25/5.0 for overall project contribution and successful completion.

PERSONAL PROJECTS:

LetSchat | Personal

Technologies: HTML, CSS, JavaScript, React.js, Tailwind CSS, Vite, Node.js, Express.js, MongoDB, JWT, WebSockets, Vercel, Resend.

- Developed a **real-time chat application** using the MERN stack, enabling instant messaging with seamless user experience.
- Implemented **JWT-based authentication** for secure user login and session management.
- Built dynamic and responsive UI using **React.js and Tailwind CSS**, ensuring smooth interaction across devices.
- Integrated **WebSocket-based communication** to enable live messaging, typing indicators, and real-time updates.
- Designed and managed backend APIs using **Node.js and Express.js**, handling user data and message storage efficiently with **MongoDB**.
- Added features like **user online/offline status, chat persistence, and media/file sharing** to enhance usability.

Delhi-Route-Optimizer | Personal

Technologies: HTML, CSS, JavaScript, React.js, Node.js, Leaflet.js, OpenStreetMap (OSM), OSRM (Open Source Routing Machine), Vercel.

- Developed a **route optimization web application** that helps users find the most efficient path between multiple locations, reducing travel time and distance.
- Integrated interactive maps to allow users to **add, modify, and visualize multiple stops dynamically**.
- Implemented route optimization logic to compute the **fastest and most efficient travel sequence** for multiple destinations.
- Utilized map-based services for **real-time route visualization and geolocation features**.
- Designed a clean and responsive UI for seamless user interaction across devices.
- Enabled features like **drag-and-drop markers, automatic route calculation, and location-based inputs**.

Delhi-Pollution-Tracker | Personal

Technologies: HTML, CSS, JavaScript, React.js, Tailwind CSS, Node.js, Leaflet.js, OpenStreetMap (OSM), AQI APIs (IQAir/OpenAQ), Chart.js/Recharts, Vercel

- Developed a **real-time air quality monitoring dashboard** that displays AQI levels across multiple locations in Delhi NCR.
- Integrated external APIs to fetch **live pollution data (PM2.5, PM10, CO, NO₂, SO₂, O₃)** and visualize it dynamically.
- Built interactive maps and dashboards to provide **location-based AQI insights and pollution trends**.
- Implemented **data visualization features** such as charts and analytics to help users understand pollution patterns over time.
- Designed a responsive and user-friendly UI for **real-time updates and easy accessibility across devices**.
- Added health-related insights and alerts based on AQI levels to improve **user awareness and safety**.

Playnex | Personal

Technologies: HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Swagger, Vercel

- Developed a **gaming and esports platform** that allows users to **participate in tournaments, create teams, and compete in matches**.
 - Designed features for **player registration, team management, and tournament tracking**, enabling a complete competitive gaming ecosystem.
 - Built a scalable system to handle **real-time updates, match listings, and user interactions**.
 - Implemented secure **user authentication and profile management** for players and teams.
 - Integrated media and content handling to support **gaming-related assets and platform interactions**.
 - Focused on delivering a responsive UI for smooth experience across devices.
-
