Profile Summary

Full-Stack Developer with hands-on experience building scalable web applications using **React, Node.js, Express, and MongoDB**. Skilled in developing RESTful APIs, database design, third-party integrations, and performance optimization. Strong problem-solving skills with a focus on writing clean, maintainable code and delivering user-focused solutions. .

Technical Skills

Programming Languages: Java, JavaScript

Web Technologies: HTML/CSS, Tailwind CSS

Databases: MongoDB, MySQL

Developer Tools: VS Code, Android Studio, Xcode, Github, Postman

Frameworks: React, Node.js, Express,

Additional Skills: DSA, OOPS,

Soft Skills: Communication, teamwork, Adaptability, Quick Learning

Projects

Adaptive Quiz AI | [GitHub](#) | *React.js, Node.js, Express.js, Python, MongoDB*

May 2026

- Built an AI-powered quiz platform that adapts question difficulty according to student performance.
- Designed the system to provide a more personalized assessment experience.
- Developed APIs for quiz management, user authentication, and performance tracking.
- Implemented a Decision Tree model to dynamically adjust question difficulty.
- Created a personalized quiz experience that dynamically responds to a student's performance.
- Combined full-stack development with machine learning to build an adaptive learning application.

Delhi Pollution Tracker | [GitHub](#) | [View](#) | *React.js, Node.js, Express.js, MongoDB, Leaflet*

April 2026

- Built a real-time dashboard to help users monitor Delhi's air pollution levels.
- Enabled users to view pollution information across different locations.
- Integrated AQI and weather APIs to retrieve live environmental data.
- Added interactive visual indicators to make pollution levels easier to understand.
- Provided users with an accessible way to monitor real-time pollution conditions across Delhi.

Delhi Route Optimizer | [GitHub](#) | [View](#) | *React.js, Node.js, Express.js, MongoDB, Leaflet*

March 2026

- Built a route optimization application to help users find efficient routes across Delhi.
- Focused on solving a real-world navigation and route-planning problem.
- Implemented shortest-path algorithms to generate optimized route suggestions.
- Integrated interactive maps for route visualization and location selection.
- Enabled users to identify optimized routes through an interactive map-based interface.

LetSchat | [GitHub](#) | [View](#) | *React.js, Node.js, Express.js, MongoDB, Socket.io*

February 2026

- Built a real-time chat application to enable users to communicate securely.
- Designed the application around user authentication and chat management.
- Developed RESTful APIs for user authentication and chat management.
- Designed structured database schemas for efficient user and chat data management.
- Delivered a complete full-stack chat application with secure authentication and structured backend architecture.

Education

Chandigarh University (CGPA: 8.5/10)

2024 – 2027

Bachelor of Computer Application

Mohali, Punjab

Trainings and Certificates

Coding Ninjas

May 2025 – Feb 2026

Full Stack Web Development
